

# Data Services

Streamline your data management cycle

## About Acolin

---

Acolin connects asset managers to new distribution opportunity by acting as an independent partner to resolve complex cross-border fund distribution challenges.

## Data Services

---

Acolin Data Services provides a complete cycle of data management as a core standalone service. Acolin manages all aspects of your data needs and ensures all underlying fund data is accurate and consistent across domains. Data moves through a structured process of checks, validation, dissemination, publication, and verification.

## Delivering on your data management goals

---

### Data Check

- Source Data is received in any standard file format (xlsx, csv, xml).
- Referential and cross-reference checks of sourced data across all domains including automated error reporting for self-checks.

### Data Validation

- Selected data points validation against the golden source/official documents (Prospectuses, KIDs, Monthly Reports, etc.), assuring accurate representation.
- Data Validation Services are performed on Static Data but could be expanded to specific Regulatory Data or Other Data sets.

### Data Dissemination

- Distribution of data to selected Data Vendors and Distribution Partners in their required formats and delivery methods.

### Data Publication

- Publication of data and documents on Fundpublications.com, a FINMA approved publication platform, for all required countries and in all requested languages.

### Data Verification

- Checking published/disseminated data against the Data Vendor feeds to assure disseminated data is properly displayed in the external systems.

# Our integrated four-stage approach across the fund distribution lifecycle

Our integrated four-stage approach across the fund distribution lifecycle

## Explore
